

SFB-Seminar im ZIB

ZEIT:

10.6.2008, 16:00 Uhr - 19:00 Uhr

ORT:

Konrad-Zuse-Zentrum für Informationstechnik Berlin (ZIB)
Takustrasse 7
14195 Berlin-Dahlem

PROGRAMM:

16:00 - 17:00 **Dr. Hans Ringström (Stockholm)**

Future stability for the Einstein-non-linear scalar field system, power law expansion

In the case of Einstein's equations coupled to a non-linear scalar field with a suitable exponential potential, there are solutions for which the expansion is accelerated and of power law type. In the talk I will discuss the future global non-linear stability of such models. The results generalize those of Mark Heinzle and Alan Rendall obtained using different methods.

17:00 - 17:30 Kaffeepause

17:30 - 18:30 **Dr. Matthias Staudacher (AEI Golm)**

Integrability and the AdS/CFT Correspondence

I will review recent progress towards the exact solution of planar supersymmetric $N=4$ gauge field theory through the discovery of integrable structures in the AdS/CFT correspondence.
